

# MARULA GIN

- Origin: Belgium
- Alcohol: 40%
- Contents: 500 ml
- Gin type: distilled gin
- Gin colour: clear
  
- Botanicals:  
juniper,  
marula fruit,  
orange blossom,  
rose petals,  
coriander,  
lavender

The marula fruit grows on the marula tree or elephant tree, so called because elephants like to eat this fruit. The marula fruit starts to ferment in their stomach, making the elephants drunk.

Inspired by this phenomenon, we decided to create a new gin based on the marula fruit from Namibia. Other well-known, handpicked botanicals include juniper berries from Tuscany, lavender from Provence, rose petals from Bulgaria, coriander from India and orange blossom from Spain.

The blend of these fine ingredients from across the world results in a sensual gin with an exotic touch.

For the perfect serve, check out our website: [www.marulagin.com](http://www.marulagin.com)

Distilled and bottled for Gintin, Emblem Belgium

A handwritten signature in gold ink, appearing to read 'Marula', is positioned to the right of the text 'Distilled and bottled for Gintin, Emblem Belgium'.
